Computer Engineer shipping production apps from embedded systems to AI-powered products.

EDUCATION

Queen's University

Kingston, ON

Bachelor of Applied Science in Computer Engineering

September 2021 – April 2026

- Coursework: Operating Systems, Algorithms, Databases, Distributed Systems, Machine Learning

SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, Java, HTML5, CSS, SQL, Verilog, RISC-V Assembly

Technologies: React, React Native, Node.js, GraphQL, PostgreSQL, Prisma, Redux, Supabase, TailwindCSS, Tauri

Tools: Git, Docker, Kubernetes, Vercel, XCode, Expo, Datadog, Figma, Blender, Arduino, Roboflow, Microsoft Office

ENGINEERING EXPERIENCE

Full Stack Engineer

August 2026 – Present

Scotiabank

Toronto, ON

- Contributing to full-stack development of internal fraud and insider threat solutions for Global Operations Technology using **C#, Python, JavaScript, and React**
- Collaborating with product, UX, and security teams within the bank's cloud infrastructure to translate business requirements into technical solutions
- Driving platform and codebase modernization efforts, incorporating **AI-driven** tooling, while maintaining code quality through Agile sprint planning and code reviews

Product Consultant & iOS Developer

May 2026 – June 2026

Stealth Startup

Toronto, ON

- Delivered a 50+ point user experience audit spanning web, mobile, and macOS desktop app, identifying critical bugs, retention risks, and interaction design gaps
- Developed a redesigned **React Native** iOS app with **TypeScript, Expo, and Storybook** component library for an AI-powered community learning platform

Software Engineer

May 2024 – August 2025

ARENA Exchange

Toronto, ON

- Architected scalable backend APIs with **Node.js, GraphQL, and Prisma**, integrating **Mixpanel**-powered real-time market alerts that increased user engagement by **24%**
- Built custom profiling tools and implemented **Datadog APM** monitoring to diagnose critical bottlenecks, improving iOS app performance from **49 FPS to 58 FPS (20% increase)** and doubling response times
- Redesigned UI components to enhance mobile app responsiveness and accessibility across the platform

PROJECTS

GlucoWatch: Hybrid Smartwatch for Diabetes Management

- Built a **React Native** app with 8+ custom components implementing **Bluetooth Low Energy** protocols, **HealthKit** integration, and a three-tier data fallback system to enable continuous, reliable glucose tracking

UVCAT: Image Processing & UV Mapping Platform

- Built a full image-processing pipeline with custom dithering algorithms and **3D UV mapping** visualization, backed by a **GraphQL/Prisma** API and community texture-pack marketplace with authentication

PIXEL-V: Browser-Based RISC-V CPU Emulator

- Designed and deployed a complete **RISC-V** CPU emulator with a custom assembler, instruction decoder, and memory-mapped graphics runtime, running entirely client-side in the browser using **TypeScript**

EXTRACURRICULAR LEADERSHIP

Co-President

July 2025 – June 2026

Queen's Music Production Club (QWave)

Kingston, ON

- Led 12+ studio jam sessions and production workshops, grew membership from 150 to 250+ students, and managed DAW software distribution for the club community

Public Speaker

September 2024 – August 2025

Toastmasters International at High Park Speakers

Toronto, ON

- Won **1st place** in a speech competition among 8+ Toronto clubs and earned **Triple Crown award** for completing communication and leadership tracks while mentoring club members
